

KARST DAY CAMP FAQs

How will Karst Day Camp be different this year from previous years?

We will have a modified version of our camp this year, with smaller numbers of campers, no traveling to field trips or swimming, a greater focus on outdoor related activities and events, slightly reduced hours, and enhanced safety protocols.

What activities will campers be participating in since there are no field trips or swimming?

We have planned an array of camp-type activities to keep campers physically active and engaged, challenge their imagination and creativity, and provide them with first-hand experience and knowledge of nature. Activities include arts & crafts, games, sports, nature programs & education, guest speakers, special events, and visits to our splash pad.

Will my camper be safe at camp? What additional safety precautions are you taking?

Karst Day Camp will be implementing CDC recommended measures to keep each camper healthy and safe. These measures include:

- *Daily health screenings for each camper and staff member*
- *New drop-off/pick-up procedures, asking parents to remain in their vehicles*
- *Reduced camp group size with limited interaction between groups*
- *Face masks and social distancing measures will be in place*
- *Enhanced cleaning and disinfecting of supplies and facilities throughout the day*
- *Minimized use of shared materials and supplies*
- *Safety techniques such as proper hand washing, etc will be taught and reviewed with campers*

What if someone shows signs of illness while at camp?

We have procedures in place to address illness during camp, including:

- *Individual is isolated & sent home*
- *Parents/guardians contacted and advised of possible exposure*
- *If individual receives positive test, contact tracing in coordination with local health department initiated*
- *Individual should follow CDC recommended testing and quarantine procedures and is not allowed back at camp until the quarantine period is over*

What do campers need to bring with them to camp this summer?

- *A lunch, two snacks and beverages in a portable lunch cooler*
- *Athletic-type shoes and a light jacket or sweatshirt*
- *Swimsuit & towel for splash pad or other water activity days (TBA)*
- *In addition to the mask they are wearing when they arrive at camp, an additional clean mask in a small baggie*

Registered families will receive a comprehensive information packet in the mail before the start of camp.
